### **Significant Incident Summary Worksheet**

For The Nakamoto Group to complete its review of your facility, the following information must be completed prior to the scheduled review dates. The information on this form should contain data for the past twelve months in the boxes provided. The information on this form is used in conjunction with the ICE Detention Standards in assessing your Detention Operations against the needs of the ICE and its detained population. This form should be filled out by the facility prior to the start of any inspection. Failure to complete this section will result in a delay in processing this report and the possible reduction or removal of ICE' detainees at your facility.

Comments: The Significant Incident Summary Worksheet represents data on ICE detainees only. There were no serious suicide attempts, hunger strikes, sexual assault allegations or escapes involving ICE detainees during this inspection period. ICE detainees are not charged a medical co-pay.

There was one death of an ICE detainee reported during this inspection period. A 58-year old Hispanic male was admitted to the facility 8/18/2018. At the time of admission, he provided no mental health history, and a history of high blood pressure and cholesterol. He was receiving medication to treat the high blood pressure which was continued. The detainee was evaluated 9/6/2018, 9/14/2018 and 10/29/2018. On 10/30/18, the detainee signed a refusal for his medication. On 11/1/2018 at 6:42 a.m., the detainee was found unresponsive on the floor. CPR was initiated and EMS was called. At 7:07 a.m., EMS arrived on scene and transported the detainee to the local hospital where he was pronounced dead. An autopsy was conducted, and the medical examiner listed the cause of death as right coronary artery thrombosis secondary to coronary atherosclerotic heart disease.

There were six immediate use-of-force incidents involving ICE detainees during this inspection period. Three of the use-of-force incidents resulted in security staff dispensing oleoresin capsicum (OC)/pepper spray to bring the detainees under control and/or follow directives. The other three incidents did not involve the use of chemical agents; those detainees responded to minor inducements. Use-of-force documentation confirmed that all detainees exposed to chemical agents were immediately decontaminated and all staff and detainees involved in the six immediate uses of force were medically evaluated. After action review determined that the force used in all of the incidents was appropriate, necessary and not excessive.

The facility does have Tasers; they are carried by supervisors. The facility does have and uses a restraint chair. Four/five-point restraints are not used at the facility. The facility does not have a canine unit. If a canine unit comes on grounds, they will not be used

in the presence of ICE detainees. The only chemical agent approved for use is oleoresin capsicum (OC)/pepper spray. The facility does not use or train staff in the use of unsafe types of restraint.
