Significant Incident Summary Worksheet

For Nakamoto to complete its review of your facility, the following information must be completed prior to the scheduled review dates. The information on this form should contain data for the past twelve months in the boxes provided. The information on this form is used in conjunction with the ICE Detention Standards in assessing your Detention Operations against the needs of the ICE and its detained population. This form should be filled out by the facility prior to the start of any inspection. Failure to complete this section will result in a delay in processing this report and the possible reduction or removal of ICE' detainees at your facility.

Comments: The Sexual Abuse and Assault Prevention and Intervention Standard was inspected during this inspection, but is not referenced in the Detention Standards Review Summary Report. The standard was rated as Meets Standard for this inspection. The SIS reflects information specific to the ICE detainee population.

There were two allegations of sexual abuse or assault during the inspection period. In the first incident, detainee one claimed detainee two exposed his penis. Following an investigation, it was learned detainee one had his back to detainee two and did not actually witness detainee two exposing his penis and, according to detainee one, no physical contact occurred. The incident was determined to be unsubstantiated. In the second incident, in a housing unit dayroom, detainee one pulled down detainee two's pants and underwear. Video monitors confirmed the incident. The incident was substantiated, and detainee one received discipline. The incidents were investigated, reported, and documented as required by the standard.

There were no escapes, deaths, or serious suicide attempts involving an ICE detainee during the past year. The facility does not deploy canines in the presence of ICE detainees. Tasers and chemical agents will be deployed on ICE detainees, if necessary. The facility has a waiver to use Freeze Plus-P, a combination of oleoresin capsicum with a chemical compound known as tear gas.

There was one calculated use of force incident during the inspection period. A detainee with mental health issues refused to come out of his cell to be placed in a suicide smock. A cell extraction was initiated. The review of documentation confirmed that officers' actions were within the guidelines of the standard.

There were eleven immediate use-of-force incidents involving ICE detainees. Seven of these incidents involved separating detainees in physical altercations with each other. In five of these physical altercations staff used approved chemical agents when detainees refused orders to stop fighting. There were four separate incidents resulting in use force on a detainee for makings threats toward staff or refusing to comply with orders by staff. Detainees were properly decontaminated in instances where chemical agents were used. After each incident, each detainee was taken to the medical unit for assessment. There were no major injuries as a result of any of these incidents. Two of the detainee-on-detainee altercations resulted in minor abrasions. An after-action review was completed for each use of force incident. It was determined that force was justified in all twelve incidents.
