Significant Incident Summary Worksheet

For The Nakamoto Group to complete its review of your facility, the following information must be completed prior to the scheduled review dates. The information on this form should contain data for the past twelve months in the boxes provided. The information on this form is used in conjunction with the ICE Detention Standards in assessing your Detention Operations against the needs of the ICE and its detained population. This form should be filled out by the facility prior to the start of any inspection. Failure to complete this section will result in a delay in processing this report and the possible reduction or removal of ICE' detainees at your facility.

☐ Does Not Meet Standards

Comments: This inspection was conducted to determine overall compliance with the ICE Performance-Based National Detention Standards (PBNDS 2011) which include the following additions/changes to the standards listed on page three:

- Medical Care (Women), a new standard, was rated Meets Standard;
- Classification System is now titled Custody Classification System;
- Suicide Prevention and Intervention is now titled Significant Self-Harm and Suicide Prevention and Intervention;
- Escorted Trips for Non-Medical Emergencies is now titled Trips for Non-Medical Emergencies;
- News Media Interviews and Tours is now titled Interviews and Tours, and;
- Transfer of Detainees is now titled Detainee Transfer.

There were no deaths or serious suicide attempts during the inspection period. The facility does not have a canine unit for contraband detection. Tasers are not used at this facility. Only members of the correctional emergency response team (CERT) and supervisors are authorized to use oleoresin capicum/pepper spray (OC). The use of unsafe types of force such as choke holds, carotid control holds and neck restraints are not authorized.

There was one detainee-on-detainee allegation of sexual abuse/assault since the last inspection involving inappropriate touching. The results of the investigation are still pending. The case file was reviewed and procedures conducted by medical and detention staff were found to comply with the requirements of the Sexual Abuse and Assault Prevention and Intervention Standard.

There was one escape during the inspection period. On 12/03/2018, at 3:10 a.m., a female ICE detainee who had been admitted to a local hospital was reported missing. A hospital nurse entered the detainee's room to check on a monitor that was beeping and found the bed empty. The nurse reported that the two correctional officers on duty were asleep when she entered the room. It was also reported that the handcuffs were still secured to the bed and that the detainee was able to get her hand out even though the handcuffs were locked. Escape procedures were immediately implemented which included notifying the local police department. Local police apprehended the escaped detainee at a local restaurant thirty minutes after the escape notification was issued. Currently, the detainee is in the restricted housing unit (RHU) pending an ICE decision on prosecution.

There were four calculated use of force incidents during the inspection period. Two of the use-of-force incidents were the result of male detainees becoming destructive and refusing an order to come out of their cells. For each incident a cell extraction team was organized and deployed. Once the team entered the cell, the detainee became compliant. The detainees were placed in restraints and escorted to the medical department for an examination. The other two calculated uses of force were the result of detainees refusing an order to come of their cell because they were being moved to the RHU. The cell extraction team was organized and deployed; force was necessary in both incidents to place the detainees in restraints. Once in restraints, the detainees were escorted to the medical department for an examination. All of the calculated uses of force were recorded on video and were reviewed during the inspection. There were no staff or detainee injuries as a result of these four incidents and chemical agents were not used. An after action review was conducted for each use of force. A review of documentation and the videos confirmed that the four use-of-force incidents were conducted in accordance with policy and the standard.
