Current Inspection Findings

I. Areas of Noncompliance

There were no areas of noncompliance identified during this inspection.

Status of Previously Identified Noncompliant Areas

II. Areas of Noncompliance

There are no previously identified areas of noncompliance.

III. Areas of Compliance with Issues Identified

Issues with artificial grass/turf that were previously identified do not appear to have been resolved.

1.2 Environmental Health and Safety

- **Observation(s):** I observed tattered and worn artificial grass/turf. The artificial grass/turf was coming up from the surface in several areas around the Yellow Frog 1 housing unit and the recreation area near the Yellow Frog and Red Parrot housing units. This poses a tripping risk for residents and staff. There were work orders in place to fix these areas. There was a missing window screen in Yellow Frog 2 and a hole in the ground by the gym near the Green Turtle 1 housing unit. I showed pictures of the areas listed to Susan Edwards, Compliance Manager.
Mitigation(s): The aforementioned artificial grass/turf issues must be resolved by either securing the turf or replacing it. Core Civic's administration and ICE are discussing a more permanent

solution to address the artificial grass/turf issues. The screen in the Yellow Frog 2 needs to be replaced. The hole in the ground near the gym near Green Turtle 1 housing needs to be filled in with dirt. We will continue to monitor these issues.

Follow up:

11/12/2019 – Unresolved: I observed the artificial grass/turf issues noted in the previous inspection. I noted a window screen from one of the living units on the ground near the yellow housing unit. There was also trash on the ground that appeared to have blown from a nearby trash receptacle near the education trailers. There had been a significant amount of wind the previous day which may have been a contributing factor. Core Civic and ICE must determine a solution to address the artificial grass/turf issues. There appear to be issues with either the product or the installation which do not permit proper drainage. Inspection of the turf in the course of the regular safety inspections should be a priority, with identified problems being addressed through the regular work order process. The window screen discovered on the ground needs to be installed. Trash on the grounds needs to be picked up and properly disposed.

01/07/2020 – Partially resolved: I found the Center to be clean and well maintained. There was no trash/debris found on the grounds anywhere throughout the Center. Center staff confirmed that there is a plan in place to repair and replace the artificial grass/turf and will continue to address immediate concerns. We will continue to monitor this issue.
