Significant Incident Summary Worksheet

For Nakamoto to complete its review of your facility, the following information must be completed prior to the scheduled review dates. The information on this form should contain data for the past twelve months in the boxes provided. The information on this form is used in conjunction with the ICE Detention Standards in assessing your Detention Operations against the needs of the ICE and its detained population. This form should be filled out by the facility prior to the start of any inspection. Failure to complete this section will result in a delay in processing this report and the possible reduction or removal of ICE' detainees at your facility.

Comments: The Sexual Abuse and Assault Prevention and Intervention Standard was inspected during this inspection but is not referenced in the Standards Review Summary Report. The Standard was rated as Meets Standard for this inspection.

There was one allegation of sexual abuse and assault during the inspection period. The allegation referenced a detainee-on-detainee incident and was determined to be unfounded. One detainee was removed from the facility. The reporting, investigation and follow up was in accordance with standard and policy guidelines.

There have been no deaths, suicide attempts or escapes during this inspection period.

During the inspection period there were four use of force incidents involving ICE detainees. There was one calculated use of force incident. The incident involved a cell extraction. A detainee refused to come out of his cell after numerous orders by staff. Staff used confrontation avoidance techniques prior to the use of force and when they were unsuccessful, the staff used a Taser to subdue the detainee. The detainee was restrained and placed in a restraint chair according to policy. The review of documentation confirmed that officers' actions were within the guidelines of the standard. The officer using the Taser was properly trained and certified for use. Staff

and the detainee were checked by medical personnel after the situation was under control. The incident was not videotaped. The fixed camera in the booking area recorded the incident, with the exception of the activity in the holding cell. The operations sergeant reported that the facility does not have a hand-held video camera. During the inspection, the OIC purchased a video camera.

There were three incidents involving immediate use of force on ICE detainees. Two of these incidents involved detainees who refused multiple orders from staff. Each detainee was placed in restraints and then into the restraint chair. In both incidents, staff followed policy and standard guidelines. Each detainee was checked by medical staff once the situation was under control. In the third incident, a detainee was disrupting his housing unit and refused staff orders to calm down. After several verbal attempts were unsuccessful, staff used OC, restrained the detainee and moved him to a holding cell. The detainee was seen by medical staff and properly decontaminated in the booking area. There were no injuries as a result of any of these incidents.

Oleoresin capsicum (OC) pepper spray is the only chemical agent authorized for use. Canines may be used for contraband detection, but not in the presence of detainees. Tasers are approved for use, when necessary.

The statistics reported on the Significant Incident Summary Report reflect the ICE population.
