Significant Incident Summary Worksheet

For The Nakamoto Group to complete its review of your facility, the following information must be completed prior to the scheduled review dates. The information on this form should contain data for the past twelve months in the boxes provided. The information on this form is used in conjunction with the ICE Detention Standards in assessing your Detention Operations against the needs of the ICE and its detained population. This form should be filled out by the facility prior to the start of any inspection. Failure to complete this section will result in a delay in processing this report and the possible reduction or removal of ICE' detainees at your facility.

☐ Does Not Meet Standards

Comments: This inspection was conducted to determine overall compliance with the ICE Performance-Based National Detention Standards (PBNDS 2008) and the Sexual Abuse and Assault Prevention and Intervention Standard (SAAPI PBNDS 2011).

There were six allegations of sexual assault or abuse involving an ICE detainee during this inspection period. All six allegations pertained to detainee-on-detainee all were determined to be unfounded. Procedures conducted were in accordance with the requirements of the standard.

Tasers are approved for use by staff trained in their use. Officers are trained on the use of oleoresin capsicum/pepper spray (OC). The Orange County Sheriff's office has a canine unit which may occasionally be used for contraband detection in the facility but never in the presence of ICE detainees.

All officers receive training in the pre-service academy in the use of the carotid control hold and policy does not prohibit the use of carotid control holds. The use of force standard prohibits this technique as a use force option for detainees. The compliance officer confirmed there have been no incidents during the inspection period involving ICE detainees where use of the carotid control hold was used. The use of neck restraints, using batons to apply choke holds, intentional baton strikes to the head, groin, solar plexus, kidneys and striking a detainee for failure to obey an order are prohibited.

During this inspection period there have been seven immediate use of force incidents involving ICE detainees. Three of the incidents involved detainee on detainee fights where staff had to use physical force to stop detainees from fighting and apply restraints. In one of these incidents staff dispensed OC (pepper spray) via a "pepper ball" round. In another incident the facility staff used a Taser to subdue a detainee who refused staff orders to stop fighting. In the other four incidents detainees were combative towards staff and

were restrained to control the detainee's behavior. There were no staff or detainee injuries as a result of any of the use of force incidents and in all cases staff and detainees were seen by medical staff as soon as the situation was under control. Review of the written documentation of the incidents indicated that the force used was appropriate in compliance with policy and the standard. An after action review of each incident was conducted for each use of force.
