Significant Incident Summary Worksheet

For The Nakamoto Group to complete its review of your facility, the following information must be completed prior to the scheduled review dates. The information on this form should contain data for the past twelve months in the boxes provided. The information on this form is used in conjunction with the ICE Detention Standards in assessing your Detention Operations against the needs of the ICE and its detained population. This form should be filled out by the facility prior to the start of any inspection. Failure to complete this section will result in a delay in processing this report and the possible reduction or removal of ICE' detainees at your facility.

Comments: This inspection was conducted to determine the overall compliance with the ICE Performance-Based National Detention Standards (PBNDS) 2008.

There were thirteen allegations of sexual assault or abuse reported since the previous inspection. Four allegations were against staff and all were determined to be unsubstantiated. Eight detainee on detainee allegations were unsubstantiated and one was substantiated. The substantiated allegation involved the slapping of the buttocks of a male detainee by another male detainee.

There were no ICE detainee deaths or serious suicide attempts since the last inspection. One non-ICE detainee death was reported since the last inspection which was determined to be a homicide. On 2/13/2018 a non-ICE detainee was found dead in his cell after his cellmate informed staff that they needed to come into the cell. It was determined that the cause of death was a homicide. The cellmate, a non-ICE detainee was charged with the homicide and is being prosecuted.

There were six immediate use-of-force incidents involving ICE detainees during this inspection period and one calculated use of force incident. The same ICE detainee was involved in four of the seven use-of-force incidents, including the calculated use of force incident. On 7/28/2018, an ICE detainee on suicide watch began to beat his head into the walls. He was ordered to stop and submit to restraints. He did not obey the order and continued to beat his head against the wall. The detainee was warned that oleoresin capsicum/pepper spray (OC) would be used and that the extraction team would be taking him to the medical department. The detainee continued to ignore all orders and instructions and OC was sprayed into the cell and the extraction team entered the detainee's cell and placed him in restraints. There were no injuries to the detainee or staff. The decontamination procedures were followed, as required by policy. A review of documentation and video recording confirmed that the calculated use of force was conducted in accordance with policy and there were no discrepancies identified. There were three immediate use of force incidents involving this same detainee refusing to follow orders from officers. The detainee was restrained in all three incidents. He was examined by medical personnel after each incident. The OIC reviewed each report and concluded that the amount of forced used in each use of force incident was justified.

Two immediate use of force incidents involved the routine application of restraints following a fight between two detainees. In the third incident a detainee assaulted an officer and it took several officers to physically control the detainee and restrain him. In this incident an officer suffered a broken finger. Some minor bruising and cuts were sustained during the fights. OC was deployed in all three incidents. The detainees were decontaminated and examined by medical personnel in accordance with policy. The OIC reviewed each report and concluded that the amount of force used in each use of force incident was justified.

Tasers are available at this facility. The use of Tasers on ICE detainees is not prohibited. Security supervisors and officers are trained and approved to use oleoresin capicum/pepper spray (OC) if warranted. Only approved use of force techniques are authorized. The following acts and techniques are specifically prohibited: choke holds, carotid control holds and other neck restraints. Batons are not used at this facility. The facility uses canines for contraband detection only but they are not used in the presence of ICE detainees.

There were no escapes or escape attempts.
