### Significant Incident Summary Worksheet

For The Nakamoto Group to complete its review of your facility, the following information must be completed prior to the scheduled review dates. The information on this form should contain data for the past twelve months in the boxes provided. The information on this form is used in conjunction with the ICE Detention Standards in assessing your Detention Operations against the needs of the ICE and its detained population. This form should be filled out by the facility prior to the start of any inspection. Failure to complete this section will result in a delay in processing this report and the possible reduction or removal of ICE' detainees at your facility.

Comments: This inspection was conducted to determine the overall compliance with the ICE Performance-Based National Detention Standards (PBNDS) 2011 (42 standards). The following are the PBNDS 2011 additions/changes to the standards listed on page three:

- Medical Care (Women), a new standard, was Not Applicable;
- Classification System is now titled Custody Classification System;
- Suicide Prevention and Intervention is now titled Significant Self-Harm and Suicide Prevention and Intervention;
- Escorted Trips for Non-Medical Emergencies is now titled Trips for Non-Medical Emergencies;
- News Media Interviews and Tours is now titled Interviews and Tours; and
- Transfer of Detainees is now titled Detainee Transfers

There were no detainee deaths and no serious suicide attempts during the past year. There were three reported incidents of sexual assault or abuse during this reporting period. All were detainee-on-detainee complaints, and all were determined to be unfounded. In all cases, reporting, investigation, and documentation were handled as required by the standard. Potential victims were protected accordingly.

The facility does not use Tasers. Canines are used for contraband detection in the facility. Canines are not deployed in the presence of detainees. Chemical agents (OC) may be used on ICE detainees as needed.

There were 52 immediate physical responses to detainee resistance during the inspection period and three planned responses. Every incident was reviewed. The high number of immediate responses is due to the fact that the facility classifies all non-routine placement of restraints, such as handcuffing a detainee after a rule infraction, as an application of force. It was determined that the responses were justified, the amount of force applied was appropriate, documentation was in order, and after action reviews were completed as

required. The team technique was utilized appropriately for all the planned responses. There were no serious injuries to staff or detainees.
