Significant Incident Summary Worksheet

For Nakamoto to complete its review of your facility, the following information <u>must be completed</u> prior to the scheduled review dates. The information on this form should contain data for the past twelve months in the boxes provided. The information on this form is used in conjunction with the ICE Detention Standards in assessing your Detention Operations against the needs of the ICE and its detained population. This form should be filled out by the facility prior to the start of any inspection. Failure to complete this section will result in a delay in processing this report and the possible reduction or removal of ICE' detainees at your facility.

Incidents	Description	Jan – Mar	Apr – Jun	Jul – Sept	Oct – Dec
Assault:	Types (Sexual ² , Physical, etc.)	7P / 1S	4P	9P / 1S	3P / 2S

All findings (Deficient and At-Risk) require written comment describing the finding and what is necessary to meet compliance.

LCI Review Assurance Statement

By signing below, the Lead Compliance Inspector (LCI) certifies that all findings of noncompliance with policy or inadequate controls contained in the Inspection Report are supported by evidence that is sufficient and reliable. Furthermore, findings of noteworthy accomplishments are supported by sufficient and reliable evidence. Within the scope of the review, the facility is operating in accordance with applicable law and policy, and property and resources are efficiently used and adequately safeguarded, except for the deficiencies noted in the report.

Recommended Rating: Superior Good Acceptable Deficient At-Risk	

Comments: The Sexual Abuse and Assault Prevention and Intervention Standard was inspected during this inspection but is not referenced in the Detention Standards Review Summary Report. The standard was rated as Meets Standard for this inspection. There were seven allegations of sexual assault or abuse during the inspection period involving ICE detainees. Two of the allegations occurred at another facility and were referred to that facility for investigation. Of the remaining five allegations, three were against staff. Two of the allegations were for inappropriate touching which were determined to be unfounded. The remaining allegation against staff was made by a female detainee against four staff for attempted rape in the housing pod. The allegation was found unsubstantiated. The two remaining allegations involved improper touching. One was determined to be unfounded and the other was unsubstantiated. Documentation of facility practice was reviewed and confirmed that all allegations were reported, investigated and completed within the requirements of the standard.

There was one non-ICE detainee death during the inspection period. On 12/31/2017, a 55-year-old white male died of natural causes. The facility reported one ICE detainee suicide attempt during this inspection period. On 12/26/2017, a 55-year-old white female threatened to jump from the second tier in the housing unit. Staff responded to the area and the female was "talked down" and placed in a restraint chair for transfer to the medical department. Medical staff reported no injuries and the detainee was placed on suicide watch. There were no escapes or hunger strikes during the inspection period.

The facility does not use canines. The facility does not have Tasers on their equipment inventory. Chemical agents will be deployed on ICE detainees if necessary. The facility reported forty-eight physical responses to detainee resistance during the inspection period. The facility reports every application of handcuffs or directional escorting as a use of force incident. All incidents were immediate uses-of-force. With the exception of one incident, review of reports indicated that force was applied within guidelines of the standard. The one use of force deemed inappropriate resulted in additional training. The medical evaluations were timely and minor injuries were treated. Oleoresin Capsicum (OC)/pepper spray was applied several times and decontamination was immediate in all cases. Review of all uses of force incidents are completed as required by the standard.

The statistics on the incident summary worksheet represent only the ICE detainee population.
