Significant Incident Summary Worksheet

For Nakamoto to complete its review of your facility, the following information <u>must be completed</u> prior to the scheduled review dates. The information on this form should contain data for the past twelve months in the boxes provided. The information on this form is used in conjunction with the ICE Detention Standards in assessing your Detention Operations against the needs of the ICE and its detained population. This form should be filled out by the facility prior to the start of any inspection. Failure to complete this section will result in a delay in processing this report and the possible reduction or removal of ICE' detainees at your facility.

LCI Review Assurance Statement

By signing below, the Lead Compliance Inspector (LCI) certifies that all findings of noncompliance with policy or inadequate controls contained in the Inspection Report are supported by evidence that is sufficient and reliable. Furthermore, findings of noteworthy accomplishments are supported by sufficient and reliable evidence. Within the scope of the review, the facility is operating in accordance with applicable law and policy, and property and resources are efficiently used and adequately safeguarded, except for the deficiencies noted in the report.

Comments: The Sexual Abuse and Assault Prevention and Intervention Standard was inspected during this inspection but is not referenced in the Standards Review Summary Report. The standard was rated as Meets Standard for this inspection. The information provided on the Significant Incident Summary Worksheet references the ICE detained population.

There were eight allegations of sexual abuse and/or assault during this inspection period. Two of the allegations occurred at a previous facility and were appropriately referred back to that facility for investigation. One allegation was reported as a third-party witness to inappropriate behavior by two non-ICE detainees, which was determined to be unsubstantiated. Four allegations were claims of verbal or visual sexual harassment, which were all determined to be unfounded. The remaining allegation involved a detainee who claimed a non-ICE detainee performed oral sex on him. The allegation was determined to be substantiated and the case has been referred for criminal charges. Documentation of facility practice was reviewed and confirmed that reporting, investigation and follow-up was within the guidelines of the standard.

There were no deaths, escapes or serious suicide attempts during the inspection period.

There were two immediate use of force incidents involving ICE detainees. In one incident a detainee had been removed from his cell and secured in handcuffs and a restraint belt secured with a padlock. The detainee slipped out of the restraint belt and began using the belt, padlock and handcuffs as a weapon and threatening staff. Pepper spray was used. Detainee was placed in the restraint chair. The

second incident involved a detainee who refused staff orders to submit to restraints. Pepper spray was used to control detainee resistance. Due to the detainee's attempts at self-injury, the detainee was placed in the restraint chair. In both cases medical attention and decontamination was prompt. No injuries were reported. Reports confirmed that force was applied within guidelines of the standard. The after-action reviews were completed in accordance with standard guidelines.

Tasers are carried by trained supervisors. However, use on detainees is prohibited. Canines are not used to control ICE detainees. Only ICE approved restraint equipment is authorized and used to restrain detainees. Chokeholds and unsafe restraining practices are prohibited by policy.

The facility did not report the number of Estimated Man-Days per year or the Estimated Facility Intake on page one of this report.
