Significant Incident Summary Worksheet

For The Nakamoto Group to complete its review of your facility, the following information <u>must be completed</u> prior to the scheduled review dates. The information on this form should contain data for the past twelve months in the boxes provided. The information on this form is used in conjunction with the ICE Detention Standards in assessing your Detention Operations against the needs of the ICE and its detained population. This form should be filled out by the facility prior to the start of any inspection. Failure to complete this section will result in a delay in processing this report and the possible reduction or removal of ICE' detainees at your facility.

LCI Review Assurance Statement

By signing below, the Lead Compliance Inspector (LCI) certifies that all findings of noncompliance with policy or inadequate controls contained in the Inspection Report are supported by evidence that is sufficient and reliable. Furthermore, findings of noteworthy accomplishments are supported by sufficient and reliable evidence. Within the scope of the review, the facility is operating in accordance with applicable law and policy, and property and resources are efficiently used and adequately safeguarded, except for the deficiencies noted in the report.

Recommended Rating:	⊠ Meets Standards
	☐ Does Not Meet Standards

Comments: This inspection was conducted to determine overall compliance with the ICE Performance-Based National Detention Standards (PBNDS 2008) and the Sexual Abuse and Assault Prevention and Intervention Standard (SAAPI PBNDS 2011).

There were four allegations of sexual assault or abuse involving an ICE detained during this inspection period; two allegations pertained to staff-on-detained and two were detained ended. Procedures conducted were in accordance with the requirements of the standard.

Tasers are approved for use by security supervisors. Officers are certified and approved to use oleoresin capsicum/pepper spray (OC). The facility does not have a canine unit but has access to a canine unit if needed for contraband detection. Canine units are not used in the presence of ICE detainees. The following acts and techniques are specifically prohibited: choke holds, carotid control holds and other neck restraints. Batons are not used at this facility.

There were six calculated and eight immediate use of force incidents involving ICE detainees during this inspection period. Five of the use of force incidents resulted in security staff dispensing oleoresin capsicum/pepper spray (OC) to bring the detainees under control and/or follow directives. The restraint chair was used for ICE detainees four times. Use of force documentation confirmed that all detainees exposed to chemical agents were immediately decontaminated and all staff and detainees involved in the eight immediate uses of forces were medically evaluated. Review of the calculated use of force incidents affirmed that medical personnel were consulted prior to use of force and were present throughout. Only two of the six calculated use of force videos were reviewed due to technical issues with the videos during the inspection. Each video reviewed involved a team technique cell extraction and placement in

the restraint chair. Both were managed as the standard requires with the noted exception that the team members did not have protective equipment. According to the OIC, personal protective equipment has been ordered.

The statistics provided on page 2, the Significant Incident Summary Worksheet, pertain only to ICE detainees.
