Significant Incident Summary Worksheet

For Nakamoto to complete its review of your facility, the following information <u>must be completed</u> prior to the scheduled review dates. The information on this form should contain data for the past twelve months in the boxes provided. The information on this form is used in conjunction with the ICE Detention Standards in assessing your Detention Operations against the needs of the ICE and its detained population. This form should be filled out by the facility prior to the start of any inspection. Failure to complete this section will result in a delay in processing this report and the possible reduction or removal of ICE detainees at your facility.

Incidents	Description	Jan – Mar	Apr – Jun	Jul – Sept	Oct – Dec	
Assault:	Types (Sexual ² , Physical, etc.)	0	1p	4p	7 p

All findings (Deficient and At-Risk) require written comment describing the finding and what is necessary to meet compliance.

LCI Review Assurance Statement

By signing below, the Lead Compliance Inspector (LCI) certifies that all findings of noncompliance with policy or inadequate controls contained in the Inspection Report are supported by evidence that is sufficient and reliable. Furthermore, findings of noteworthy accomplishments are supported by sufficient and reliable evidence. Within the scope of the review, the facility is operating in accordance with applicable law and policy, and property and resources are efficiently used and adequately safeguarded, except for the deficiencies noted in the report.

Recommended Rating: Superior Good Acceptable Deficient At-Risk				

Comments: The Sexual Abuse and Assault Prevention and Intervention Standard was inspected during this inspection but is not referenced in the Standards Review Summary Report. The Standard was rated as Meets Standard for this inspection.

There were two SAAPI allegations involving ICE detainees during the inspection period, one of which involved staff. Both allegations were unfounded. The reports were investigated and protocols were followed according to the Standard.

There were no escapes, deaths or serious suicide attempts during the inspection period. The facility has a canine unit which patrols the perimeter of the facility and may be used for contraband detection but never in the presence of ICE detainees. Chemical agents are authorized for use by supervisors. Tasers are not used.

There was one planned and four immediate physical responses to resistance involving ICE detainees during this inspection period. The planned incident was due to a detainee refusing to exit his cell. The detainee was extracted from his cell and placed in the restraint chair. The immediate reactions all involved refusal to follow orders. In all incidents the force was necessary, reasonable, and only applied for the duration required. Medical staff was deployed as required and there were no injuries sustained by detainees or staff. All incidents were administratively reviewed.

The statistics provided on the Significant Incident Summary Worksheet represent ICE detainees only.
