## Significant Incident Summary Worksheet

For Nakamoto to complete its review of your facility, the following information <u>must be completed</u> prior to the scheduled review dates. The information on this form should contain data for the past twelve months in the boxes provided. The information on this form is used in conjunction with the ICE Detention Standards in assessing your Detention Operations against the needs of the ICE and its detained population. This form should be filled out by the facility prior to the start of any inspection. Failure to complete this section will result in a delay in processing this report and the possible reduction or removal of ICE' detainees at your facility.

Incidents	Description	Jan – Mar	Apr – Jun	Jul – Sept	Oct – Dec
Assault:	Types (Sexual <sup>2</sup> , Physical, etc.)	N/A	Physical	N/A	Physical

All findings (Deficient and At-Risk) require written comment describing the finding and what is necessary to meet compliance.

## **LCI Review Assurance Statement**

By signing below, the Lead Compliance Inspector (LCI) certifies that all findings of noncompliance with policy or inadequate controls contained in the Inspection Report are supported by evidence that is sufficient and reliable. Furthermore, findings of noteworthy accomplishments are supported by sufficient and reliable evidence. Within the scope of the review, the facility is operating in accordance with applicable law and policy, and property and resources are efficiently used and adequately safeguarded, except for the deficiencies noted in the report.

Comments: The Sexual Abuse and Assault Prevention and Intervention Standard was inspected during this inspection, but is not referenced in the Standards Review Summary Report. The standard was rated as Meets Standard for this inspection. The information provided on the Significant Incident Summary Worksheet references the ICE detained population.

During the inspection period, there was one SAAPI incident reported. A male ICE detainee reported that while he was sleeping, another male ICE detainee touched his penis. The detainee reported the incident to housing unit security personnel. The victim was able to identify the aggressor, and the two detainees were separated. Both were evaluated by medical and mental health personnel. The incident was investigated and determined to be "substantiated". The aggressor was transferred to another facility and eventually was criminally charged. Documentation of facility practice was reviewed and confirmed that reporting, investigation and follow-up was within the guidelines of the standard.

There were no deaths, escapes or serious suicide attempts during the inspection period.

During this inspection period there were no calculated use of force incidents. There was one immediate use of force incident. The incident was a result of a physical fight between two detainees. The detainees were ordered to stop fighting and to separate. The detainees refused to comply and the deployment of oleoresin capsicum (OC) spray was required to gain control. Once the detainees stopped fighting, the detainees were placed against the wall and hand restraints were applied. The detainees were examined by

medical personnel. There were no serious injuries. A review of documentation confirmed that all actions, documentation, decontamination procedures and after-action review were within the guidelines of the standard and performed in a timely manner. Tasers are carried by trained officers and may be used on detainees, if necessary. The use of oleoresin capsicum (OC) is authorized. Canines are brought into the facility on a quarterly basis. All detainees are removed from the area when the canine unit is to be used. Canines are never used in the presence of ICE detainees. Only ICE approved restraint equipment is authorized and used to restrain detainees. Chokeholds and unsafe restraining practices are prohibited by policy.
