Significant Incident Summary Worksheet

For Nakamoto to complete its review of your facility, the following information <u>must be completed</u> prior to the scheduled review dates. The information on this form should contain data for the past twelve months in the boxes provided. The information on this form is used in conjunction with the ICE Detention Standards in assessing your Detention Operations against the needs of the ICE and its detained population. This form should be filled out by the facility prior to the start of any inspection. Failure to complete this section will result in a delay in processing this report and the possible reduction or removal of ICE detainees at your facility.

Incidents	Description	Jan – Mar	Apr – Jun	Jul – Sept	Oct – Dec
Assault:	Types (Sexual ² , Physical, etc.)	0	0	1P	0

All findings (Deficient and At-Risk) require written comment describing the finding and what is necessary to meet compliance.

LCI Review Assurance Statement

By signing below, the Lead Compliance Inspector (LCI) certifies that all findings of noncompliance with policy or inadequate controls contained in the Inspection Report are supported by evidence that is sufficient and reliable. Furthermore, findings of noteworthy accomplishments are supported by sufficient and reliable evidence. Within the scope of the review, the facility is operating in accordance with applicable law and policy, and property and resources are efficiently used and adequately safeguarded, except for the deficiencies noted in the report.

Comments: The Sexual Abuse and Assault Prevention and Intervention Standard was inspected during this inspection, but is not referenced in the Detention Standards Review Summary Report. The standard was rated as Meets Standard for this inspection.

There was one allegation of sexual abuse or assault during this inspection period involving one ICE detainee. The allegation was investigated and determined to be unsubstantiated. The potential victim was protected, the report and investigation were documented appropriately, and all procedures were conducted within the parameters of the standard.

There was one immediate physical response to detainee resistance involving an ICE detainee during the inspection period. The detainee made a threatening gesture towards an ICE officer and a facility housing unit officer took the detainee to the floor in response. The after-action review concluded that force was applied within guidelines of the standard. Medical services were engaged immediately and there were no serious injuries.

There were no deaths, serious attempted suicides, escapes, or attempted escapes during this inspection period. The facility has Tasers but they are not deployed on ICE detainees. Detection canines may be deployed in the facility, but not in the presence of ICE detainees. Chemical agents are carried by all trained staff and may be deployed on ICE detainees.

The incident graph on page two represents ICE detainees only.
